Subject: Clean Harbors Partial Closure of Buildings B, D, and J - Wichita, KS

Akhter

iSi Environmental has been contracted to assist Clean Harbors with the Partial Closure of Buildings B, D, and J located at 2549 New York Avenue in Wichita, Kansas. This email is to provide you with a proposed schedule of sampling/field work activity to be completed at the site. Please note that the work completed by iSi will only involve the decontamination of the hazardous waste units and is not associated with the sub-slab soil sampling being conducted at the site. Clean Harbors Remediation Services is currently completing the decontamination of Building B.

Rinsate/Water sampling will be conducted in the following time frame:

- Collect tap water sample on 1-13-14.
- Collect third rinse water from Building B on 1-13-14.
- Collect third rinse water from exterior of nested tanks (located in Building D) on 1-15-14 or 1-16-14.

Please note that this is a tentative schedule, and is subject to change. A more formal schedule is currently being drafted. In the event of a change in the sampling schedule, I will notify you as soon as possible.

If you have any questions, please feel free to contact me.

Thank You

Brady Gerber
